Two big birthdays at AS&P in Frankfurt

In 2014 Prof. Albert Speer is celebrating his 80th birthday and AS&P - Albert Speer & Partner GmbH its 50th anniversary

Frankfurt/Main. In 2014 two big birthdays are being celebrated at AS&P in Frankfurt: Architect and urban planner Prof. Albert Speer turns 80 in July, and the architecture and planning office he founded in 1964 is celebrating its 50th anniversary. He and his team can look back with pride at the experiences gained from half a century of international planning practice, over 4,000 projects completed in over 23 countries, and a constantly expanding interdisciplinary team of more than 160 employees. "I'm proud of how my office has developed – the international team and the successes," says Albert Speer.

Albert Speer, who for 25 years was professor of urban and regional planning at the University of Kaiserslautern, is one of the most important German urban planners, and is considered a pioneer of sustainable urban planning. The man who elected to live in Frankfurt coined the central concept of the "intelligent city" and became active early on in working to combat the decay and desolation of city centers. In 1972 he received his first large architectural commission from DG Bank in Frankfurt/Main. Today, the name Speer is associated with large-scale projects such as EXPO 2000 in Hanover and planning projects in Saudi Arabia or for megacities in China and Egypt. Albert Speer was internationally oriented from the start, and he and his office handle projects around the globe. "My work is for me profession, hobby and challenge," says Speer, who since 1984 has headed AS&P - Albert Speer & Partner GmbH together with his partners Gerhard Brand and Friedbert Greif.

Founded in 1964, AS&P now has offices in Frankfurt/Main and Shanghai, and employs over 160 architects, urban planners, traffic planners and landscape architects. The architecture and planning office boasts 50 years of international planning and construction experience, an inter-

Professor Dipl.-Ing. Albert Speer Biography

Professor Albert Speer was born in 1934 in Berlin; he initially trained as a carpenter and gained his high school leaving certificate before studying Architecture in Munich; he then went on to specialize in planning entire cities and regions worldwide. Prof. Speer was Chair of Urban and Regional Planning at Kaiserslautern Technical University for over 25 years. Nowadays the architecture and planning firm he founded in 1964 has a payroll of more than 160 employees. From the outset there was an international thrust to Albert Speer's work. In 2007 AS&P-Albert Speer & Partner GmbH opened a branch office in Shanghai.

His most important projects include the master plans for several new cities in China, for the EXPO 2000 in Hanover and the successful bid for the FIFA World Cup™ 2022 in Qatar. Among other things Prof. Albert Speer designed the Diplomatic Quarter in Riyadh, Saudi Arabia and drew up concepts for the central area of Abuja, the Nigerian capital. In Germany he developed the master plan for Cologne city center and the memorandum "Frankfurt for Everyone", a strategic urban development study whose target horizon is 2030. The firm is currently working on the future-oriented master plan and the innovation manual for "InnovationCity Ruhr", with Bottrop as a model city, and the strategic master plan for the urban development of Alexandria, Egypt's second largest city.

Albert Speer has been a member of the German Academy for Urban and Regional Planning since 1970. In 1995 he founded the Professor Albert Speer Foundation. In 2004 he received the Leading Architecture Award from the German Association of Architects and Civil Engineers. Since 2008 he has been a member of the Board of Trustees of "Nationale Stadtentwicklungspolitik" (National Urban Development Policy). Albert Speer has received the Goethe Badge of the City of Frankfurt/Main, the Leading Architecture Award, and the Federal Order of Merit. In 2011 he was made an Honorary Professor of the Technical University in Munich.

Albert Speer in Shanghai, 2011

AS&P - Albert Speer & Partner GmbH *architects, planners*

Office profile

The office of AS&P – Albert Speer & Partner GmbH combines innovative approaches in architecture, urban and transport planning with over 50 years of international planning and building experience. The projects range from multi-storey dwellings and high-rises, urban planning, urban and regional development and landscape architecture to recreation and tourism planning, conceptual transport planning and project management as well as planning-specific preparation of major events and expert opinions for policy advising.

In addition to its Shanghai branch and temporary project offices, AS&P's home office is located in Frankfurt am Main. AS&P - Albert Speer & Partner GmbH has held a stake of 34% of the ordinary capital of PROPROJEKT Planungsmanagement & Projektberatung GmbH since 1996. Currently, AS&P employs around 160 professionals and thus consists of a capable and diverse team of highly motivated and multifaceted experts. Projects are developed by individually compiled teams. Due to the growing complexity and thematic diversity of assignments, AS&P relies on its experienced and constantly expanding network of specialists from varying disciplines.

AS&P's creativity and knowledge is conveyed through its projects in many countries worldwide. On the other hand, the team consciously integrates its cultural, technological and human experiences collected internationally into its projects in Germany. Sustainability, broadly understood in terms of ecological, economical and social quality, is self-evident in high quality planning and, as a sign of common sense, is always the basis of AS&P's work.

At a national level, AS&P conceived the master plan for downtown Cologne, the prospects for action for Frankfurt 2030 and the framework plan for Frankfurt's new quarter Europaviertel. Other projects included the application to host the 2018 Winter Paralympics in Munich, the BMW Used Automobile Center in Dreieich, the ensemble on Baseler Platz in Frankfurt/Main, the EXPO 2000 in Hanover and numerous airport development planning projects and passive housing projects. 2013 saw the completion of the Fraport AG headquarters at Frankfurt Airport and the passive apartment block project "Wohnen am Riedberg". Currently, the office is working on the pioneering master plan and innovation manual for InnovationCity Ruhr | Model City Bottrop.

Its international activities encompass Algeria, Azerbaijan, Belize, China, Croatia, Egypt, Kazakhstan, Libya, Luxembourg, Nepal, Nigeria, Oman, Poland, Qatar, Rumania, Russia, Saudi Arabia, Sweden, Switzerland, Turkey, Vietnam and the United Arab Emirates. AS&P has been present in Saudi Arabia since the 1980s with a host of projects. The first was the planning for the Diplomatic Quarter in Riyadh in 1980. At present, projects include the master plan for the Ministry of Commerce and Industry (MCI) Business Park in Riyadh and an urban planning concept plan for residential areas in the Eastern province. The "Criminal Court Complex" in Riyadh, for whose design AS&P won first prize in an international competition in 2005 is now reaching completion. In 2010, AS&P collaborated with PROPROJEKT GmbH and the Serviceplan Gruppe für innovative Kommunikation GmbH to draw up Qatar's successful application documentation for the 2022 FIFA World CupTM. Moreover, in 2014 the office was commissioned with devising the "national master plan for public leisure and sporting facilities" in Qatar. In Egypt AS&P has been working

on the strategic master plan for the city of Alexandria since 2010. In addition, AS&P is responsible for the master plan for 6th of October City in Cairo. In Russia, master plans are being drawn up for the Ministry of Economic Development of the Russian Federation for six new "special economic zones for tourism" and AS&P is developing a master plan vision for an area south-west of Moscow measuring roughly 400 square kilometers. In China, where AS&P has been active since 1999, and since 2007 has been represented with a local subsidiary, AS&P - Architects Consulting (Shanghai) Co., Ltd., the office has handled over 200 projects in more than 30 cities. They included a string of first prizes in international city planning, urban development and architecture competitions: for the extension Hanzhong Garden City, the urban extension Nanchang AVIC Hongdu, Zhonglou New Town Core in Changzhou, Shanghai North Bund master plan, International Automotive City, and the 120-square-kilometer expansion of Changchun, including the new administration centre, but also for the new district Jing Yue Ecological City for 500,000 inhabitants. Jing Yue Ecological City, the Nord Bund and the International Automobile City with Anting New Town in Shanghai are some of the projects now being realized.
